# KD68

Payment Speaker

The KD68 payment speaker is appropriate for a variety of microtransactions. It allows real-time broadcast and 4G communication to keep users informed about the progress of their transactions. Meanwhile, KD68 uses a segment display and TFT colorful display, allowing it to show the payment amount and a dynamic QR code. The user experience and scenarios were improved by KD68's features.

**Dynamic QR Code**

Security

**Powerful Battery**

Longer battery Life

**Hi-Fi Speaker**

High Sound Quality

# Hi-Fi Speaker with Air Filter

The KD68 is equipped with a high-fidelity speaker, which ensures good sound quality even when the volume is turned up high.

The built-in air filter effectively prevents the entry of dust, oil, and microscopic creatures, allowing the device to function well in difficult settings.

Hi-Fi Speaker

Air Filter

# Dynamic QR Code

The KD68's 2.4" TFT color screen of KD68 makes cash register operating easier.

Store Information

# Segment Display

The KD68 has a 6\*7 segment code screen that may display the amount received. The loss of transactions in busy and noised settings can be avoided by collaborating with voice broadcasting. More than that, information such as electricity and communication quality can be displayed without the use of voice broadcasting.

Amount Display

Device information

# Powerful Battery

After upgrading, the battery standby time can be extended to more than 96 hours. Furthermore, KD68 can handle 1000 transactions each day. Longer service life leads to higher return on assets.

96+ Hours

1,000+ Transactions
